## ODYSSEY

A collection of lighting inspired by celestial bodies, space, dreams, things far and away. 'Odyssey' is a continuous exploration into the intrigues of other worlds.

## IO

Striking as a floor or table lamp, this spun brass orb casts a light-stippled shadow field on the surface below. Capped by a hand faceted glass lens, IO, her round shape and name alludes to the innermost moon of Jupiter discovered by Galileo, named for the mythological priestess.

## SPECIFICATIONS
