

CLOUD COFFEE TABLE

New for 2021, the Cloud collection celebrates form and shape, texture and material, as well as the blacksmith's art. The amorphous cloud-like shape of the top is one Tom has used before – most notably in the bed he designed for Savoir Beds in 2020.

The marble itself seems to float within the frame – which is made of four exquisitely forged legs – each made with traditional blacksmithing techniques.

Cloud can be made with any of our marbles, and the legs can be made in either steel or bronze. [Click here to see our range of finishes and marbles.](#)
