

BALZAC DESK

This multi-faceted Balzac desk – which looks like a nugget of folded steel – is ideal for the modern home office, or indeed as a work of art in its own right.

It is the perfect size, with three drawers at the front – made in solid walnut, and a cable management system at the back.

It is such a contemporary piece, but there is a nod to tradition with its rich leather top – just right for writing all those letters!

(But no provision for an inkpot – sorry)

Have a look at the finish options [here](#).
