

LIGHT WEIGHT LINEN IN WIMPLE

Code: 11132

Application: Curtains, Soft Furnishings

Composition: 100% Linen

Woven from the finest linen, Wimple is constructed as an irregular sateen. This structure introduces a subtle variation across the surface, creating a delicate herringbone effect that becomes gently apparent on the face, while the reverse retains the smooth character of a classic sateen.

At 320 cm wide, Wimple is ideal for refined and versatile drapery. Once off the loom, the fabric is washed and then softened, developing a gentle sheen and a supple hand. Weighing just under 300 g per square metre, it offers body without heaviness, allowing curtains to fall in long, fluid folds that capture light in soft tonal shifts. This effect is

enhanced by the pure white colourway of Wimple, allowing the quiet pattern of the weave to take focus.
