

LINEN WOOL BLEND IN FRENCH SAGE

Code: 11144

Application: Upholstery, Curtains, Soft Furnishings

Composition: 55% Linen, 35% Wool, 10% PA

Woven from a thoughtful blend of linen and wool, French Sage combines the freshness of linen with the warmth and substance of wool, resulting in a texture that feels both grounded and refined. Crafted on a dobby loom, its irregular, nubby surface reveals the natural character of the fibres - the linen bringing crisp definition, the wool lending body and softness.

Piece-dyed to enhance its tonal depth, the interplay between the two fibres produces subtle shifts in colour where they absorb dye differently, creating a surface alive with quiet variation and dimension. Weighing a substantial 1,000 g per square metre and

rated at 100,000 Martindale, the fabric offers reassuring durability with a relaxed, organic look.

Ideal for upholstery, curtains, and soft furnishings, French Sage holds its shape beautifully while retaining a natural, tactile quality - combining strength, comfort, and understated elegance.

Martindale: 100,000
