

## MID WEIGHT LINEN IN HONEY MILK

Code: 11124

Application: Upholstery, Curtains, Soft Furnishings

Composition: 100% Linen

Woven from pure linen, Honey Milk is defined by its small-scale, nubby texture - a surface alive with subtle irregularity and movement. The effect is achieved through twisted yarns that lend natural dimension and character, giving the fabric a lively tactility. After weaving, it is softened through a mechanical process that enhances volume and suppleness without the use of chemical treatments, preserving the purity and integrity of the linen.

Weighing just over 450 grams per square metre and tested to 32,000 Martindale, Honey Milk combines strength with flexibility, offering a satisfying balance of structure and

ease. Piece-dyed for clarity and depth of colour, its texture and tone shift gently with the light, revealing quiet richness and visual interest.

The result is a fabric that feels both natural and refined, durable yet soft, simple yet full of character - making it beautifully suited to upholstery, curtains, and cushions alike.

Martindale: 32,000
