

SHEER LINEN WOOL BLEND IN BREEZE

Code: 11141

Application: Curtains, Soft Furnishings

Composition: 80% Linen, 10% Wool, 8% CV, 2% PA

Inspired by a fabric Rose discovered in Japan, Breeze is a sheer of delicate complexity and quiet elegance. Woven from a blend of long-fibre linen, slub linen, wool, and rippled linen ondé yarns, the weave combines fine, airy threads with thicker, more textured ones. The result is a surface that shifts naturally between open and denser areas, creating a delicate interplay of transparency, texture, and soft movement.

At a generous 325 cm width, Breeze is ideal for expansive curtains, its layered textures diffusing light in soft, rhythmical, atmospheric ways. The contrasting yarns require careful handling during weaving to maintain stability while preserving the fabric's airy

R

delicacy. The finished fabric balances transparency with presence, openness with structure, and refinement with tactile depth, offering a sheer of understated complexity and serene elegance.
