

## SHEER LINEN WOOL BLEND IN WISP

Code: 10350

Application: Curtains, Soft Furnishings

Composition: 83% Linen, 11% Wool, 3% PC, 3% PES

Woven on a dobby loom from a considered blend of linen and wool, Wisp has a sheer, layered character that feels both artisanal and refined. The linen warp brings freshness and transparency, while the wool adds warmth and softness. A naturally toned bouclé yarn introduces fine loops that lend gentle texture, complemented by ecru linen slub yarns that create irregular highlights across the surface. Together, these elements form a fabric that is airy and dimensional, with subtle horizontal striping that adds quiet rhythm and depth.

At 280 cm wide, this sheer is perfectly suited to generous drapery and soft furnishings.

# R

Its weave balances openness with body, allowing light to filter through in shifting tones while maintaining a sense of structure. The interplay of yarns and textures gives Wisp its distinctive presence - a fabric of quiet complexity, natural tactility, and understated elegance.
