

TEXTURED WOOL IN ICE CREAM

Code: 11159

Application: Upholstery, Curtains, Soft Furnishings

Composition: 100% Wool

Woven in 100% wool, Ice Cream combines an intricately textured crepe structure with thick, combed woollen yarns to create a fabric of quiet depth and tactile character. The complex interplay of warp and weft forms a subtle, non-directional surface - organic, irregular, and softly pebbled. This structure enhances both strength and dimensional stability, balancing resilience with fluidity (37,000 Martindale).

Weighing 700 grams per square metre, Ice Cream is substantial yet pliable, ideal for upholstery, curtains, and soft furnishings. Its compact weave and natural wool fibres catch the light in gentle variation, bringing warmth and nuance to any surface.

R

Expressive yet understated, the fabric's richly tactile quality and pale cream tone reflects the inherent beauty of pure wool - robust, comforting, and quietly sophisticated.

Martindale: 37,000
