## Moiré Table Lamp

FG008432 Special Shade

Having created this beautiful straw marquetry finish in our workshop, we wanted to use it on a simple form that reflects the changes in colour and appearance depending on how you view it and the light conditions - a living light. Our straw has been carefully dyed and applied in a very fine inlay technique that creates a moiré silk effect or even a watery current through the material - one colour melting into another in a shimmering pattern. The sensuous form of the Moiré Table Lamp is capped by the woven intricacy of Anne Corbiere's Cadenza fabric to continue the intricate weaving sensibility.
